TECHNICAL EXPERIENCE

Projects

Personal Portfolio Website

HTML, CSS, JavaScript, Google Maps API
Developed and deployed a responsive personal portfolio website to showcase projects and professional background. Designed a clean and user-friendly UI using HTML, CSS, and vanilla JavaScript. Integrated Google Maps API to visually display current location. Implemented seamless page redirection for navigation between sections (About, Projects, Contact, etc.). Built a functional contact form with local storage support to retain user inputs for offline reference.

ATS Tracker

HTML, CSS, JavaScript, and Gemini
Developed an Applicant Tracking System (ATS) using HTML, CSS, JS to streamline resume screening and shortlisting. Built an UI to upload and parse multiple resumes simultaneously along with job description. Automated candidate ranking with visual scores, allowing multi-candidate selection for faster recruitment decisions.
